

ELIGIBILITY & BENEFITS

Fellowships are available for postdoctoral training in all scientific areas of study at OHSU. Priority will be given to individuals from historically underrepresented groups, based on research priority needs.

Fellows receive mentorship, grant writing assistance, and scholarly training. Also:

- Salary and benefits for first year of postdoctoral research (and support to seek other funding for additional years)
- Up to \$5000 for professional development and research materials
- Up to \$3000 for relocation costs

ABOUT US

Our History

The OHSU Fellowship for Diversity in Research was started in 2014 by two POC faculty at OHSU - Doctors Damien Fair and Marguerite Matthews. It is now administrated by Dr. Letisha Wyatt.

Their research focuses include cancer, neuroscience, addiction, dentistry, wellness and memory, and more.

Our Leadership

Our programming is guided by a committee of individuals from various departments across OHSU who are dedicated to advancing a culture of diversity, equity and inclusion. The Research Diversity Advisory Committee supports the OFDIR program by advising on and overseeing changes to the program as well as helping in the process of selecting new Fellows.

WHAT IS OFDIR?

The OHSU Fellowship for Diversity in Research (OFDIR) Program is a competitive program whose goal is to increase the diversity of the community of scholars devoted to academic scientific research at OHSU. We seek to attract promising researchers and educators from different backgrounds, races, ethnic groups, and other diverse populations whose life experience, research experience and employment background will contribute significantly to the academic mission of OHSU.

*Preparing postdocs from
historically underrepresented
backgrounds for academic
careers at major universities*
